

Section:University of Chicago5

Context: In 1929, the university's fifth president, Robert Maynard Hutchins, took office; the university underwent many changes during his 24-year tenure. Hutchins eliminated varsity football from the university in an attempt to emphasize academics over athletics, instituted the undergraduate college's liberal-arts curriculum known as the Common Core, and organized the university's graduate work into its current[when?] four divisions. In 1933, Hutchins proposed an unsuccessful plan to merge the University of Chicago and Northwestern University into a single university. During his term, the University of Chicago Hospitals (now called the University of Chicago Medical Center) finished construction and enrolled its first medical students. Also, the Committee on Social Thought, an institution distinctive of the university, was created. CANNOTANSWER

STUDENT: **Who was the university's 5th president?**

TEACHER: ↪ "" (Robert Maynard Hutchins)

STUDENT: **In what year was the university's 5th president granted his position?**

TEACHER: ↪ "" (1929)

STUDENT: **How long did the 5th president's tenure last?**

TEACHER: ↪ "" (24-year tenure)
