 TEACHER: ⇨ "" (CANNOTANSWER)

STUDENT: **What is temperature does Hopetoun average in February?**
 TEACHER: ⇨ "" (CANNOTANSWER)

STUDENT: **When was the heatwave in which Wimmera recorded its highest temperature?**
 TEACHER: ⇨ "" (CANNOTANSWER)

Section: Victoria (Australia)9

Context: The Mallee and upper Wimmera are Victoria's warmest regions with hot winds blowing from nearby semi-deserts. Average temperatures exceed 32 C (90 F) during summer and 15 C (59 F) in winter. Except at cool mountain elevations, the inland monthly temperatures are 27 C (413 F) warmer than around Melbourne (see chart). Victoria's highest maximum temperature since World War II, of 48.8 C (119.8 F) was recorded in Hopetoun on 7 February 2009, during the 2009 south-eastern Australia heat wave. CANNOTANSWER
